Project Presentations since the first
Collaborative meeting

HSE Collaborative Timeline

HSEC 2026 Member Survey Results

HSEC Value

Members value the Collaborative for its:

- **Broad range of participants** with **diverse expertise & perspectives**
- Focus on a **shared goal & geography**: the estuary
- Opportunities to make **connections between projects & participants** to identify **opportunities to collaborate**

- **Collaborative's Goal** could be updated to use **EMP** as guiding document

Content & Structure

Members are ok with current format & structure, but could be improved with:

- **Yearly in-person meetings** for better discussion/to address specific topics of interest
- **More opportunities for discussion**
- **More Structured meetings**

Member Resources

- Need / Want for a **HSE literature Resource Library** with relevant studies & reports

Current Gaps & Future Needs

Resource Gaps for Members

- Funding !
- Directory of Collaborative Members to facilitate connection & collaboration

EMP Integration

- Support for integration of EMP into meeting content, structure, and project tracking

What's Next?

2026 HSE Collaborative Goals:

1

Identify current collaboration between members and their work to understand where there are gaps and opportunities to catalyze strategic new collaborations.

2

Integrate the EMP as a grounding guiding document for the group and revisit prioritization of the actions set forth in the EMP.

3

Continue to adapt HSE Collaborative content and programming to better engage members to support their work through open dialogue and solicited feedback.
